

BeyondTrust Corporate Overview

The leader in preventing data breaches from insider privilege abuse and external hacking attacks

Reducing IT security risk with unmatched visibility and control

The majority of data breaches today involve insider privilege abuse, external hacking attacks, or often a combination of the two. Employees, vendors and contractors frequently have unnecessary access to sensitive systems and data, while unpatched IT assets open the door to cybercriminals. Despite massive investments in security infrastructure, IT and security leaders still struggle to obtain a clear picture of risk — let alone take decisive action to eliminate it.

BeyondTrust® is a global security company that believes preventing data breaches requires the right visibility to enable control over internal and external risks. We give you the visibility to confidently reduce risks and the control to take proactive, informed action against data breach threats. And because threats can come from anywhere, we built a platform that unifies the most effective technologies for addressing both internal and external risk: Privileged Account Management and Vulnerability Management.

BeyondTrust: Your ally against internal and external IT threats

Your IT and security teams have plenty of adversaries to worry about — inside and outside, malicious and accidental. BeyondTrust can be your ally against all of them.

Our 4,000+ customers leverage class-leading PowerBroker® Privileged Account Management (PAM) and Retina Vulnerability Management (VM) solutions that share a common management, reporting and analytics platform.

The BeyondInsight™ platform not only integrates our solutions, but also includes advanced Clarity Threat Analytics capabilities that reveal critical risks hidden within volumes of data. IT and Security departments are therefore unified and empowered with the visibility and control they need to prevent breaches, maintain compliance, and ensure business continuity.

Why BeyondTrust?

WE MITIGATE THREATS WITHOUT REDUCING PRODUCTIVITY

Our solutions reduce insider threats, shrink external attack surfaces, and contain any criminals who find their way in — without hampering user productivity.

WE PROVIDE SINGLE-PANE VISIBILITY INTO RISK

Our centralized management, reporting and threat analytics platform reduces blind spots across the largest, most diverse IT environments.

WE ENABLE PROACTIVE SECURITY

Our reporting and threat analytics capabilities provide clear, concise, prioritized information about risky assets and users in your environment — plus the insight you need to take immediate action.

WE DESIGN FOR TOMORROW AND DELIVER TODAY

We equip you to keep pace with the rapidly evolving threat landscape, whether you need to secure traditional network and application environments, or protect the latest cloud, mobile and virtual infrastructure.

WE'VE GOT YOUR BACK

From world-class professional services to available 24x7 support, BeyondTrust is part of your team and there when you need us.

BEYONDINSIGHT IT RISK MANAGEMENT PLATFORM

BeyondTrust Privilege and Vulnerability Management solutions are unified by the BeyondInsight management, reporting and threat analytics platform.

The BeyondInsight IT Risk Management Platform

The BeyondInsight IT Risk Management Platform unifies BeyondTrust privileged account management and vulnerability management solutions under a common operating environment. Capabilities include:

- Centralized management and control
- Asset discovery, profiling and grouping
- Advanced threat analytics
- Extensive, customizable reporting
- Central workflow and ticketing
- Data sharing between BeyondTrust solutions

The result is a fusion of internal and external threat intelligence that allows IT and security teams to collectively reduce risk across complex environments.

BeyondInsight's Clarity Advanced Threat Analytics capabilities correlate and analyze diverse asset and user data to identify critical threats in your IT environment.

Privileged Account Management

PASSWORD AND SESSION MANAGEMENT*

PowerBroker Password Safe is an automated password and session management solution that provides secure access control, auditing, alerting and recording for any privileged account.

DESKTOP LEAST PRIVILEGE MANAGEMENT*

PowerBroker for Windows & PowerBroker for Mac reduce the risk of privilege misuse on end-user desktops. They eliminate local admin privileges, enforce least-privilege policy, maintain application access control, and log privileged activities.

SERVER PRIVILEGE MANAGEMENT*

PowerBroker for UNIX & Linux and **PowerBroker for Windows** allow organizations to delegate server privileges and authorization without disclosing root passwords. They can also record privileged sessions and keystrokes for audits and compliance.

ACTIVE DIRECTORY BRIDGING

PowerBroker Identity Services centralizes authentication for UNIX, Linux and Mac by extending Active Directory authentication and single sign-on capabilities to these platforms.

AUDITING AND PROTECTION

PowerBroker Auditor solutions reveal the "who, what, when and where" behind changes to Active Directory, Exchange, SQL, and Windows File system.

Vulnerability Management

ENTERPRISE VULNERABILITY MANAGEMENT*

Retina CS provides organizations with vulnerability assessment, risk analysis, and reporting. Customers proactively identify exposures, analyze business impact, and conduct remediation across network, web, mobile, cloud and virtual infrastructure.

VULNERABILITY SCANNING

Retina Network Security Scanner, with over 10,000 deployments, is the most sophisticated vulnerability assessment solution on the market. Available as a standalone application or as part of Retina CS, Retina Network enables you to efficiently identify exposures and prioritize remediation enterprise-wide.

CLOUD-BASED SCANNING

BeyondSaaS™ is a cloud-based, network and web vulnerability assessment solution that gives you an attacker's-eye view of your IT perimeter.

DYNAMIC WEB APPLICATION SCANNING

Retina Web Security Scanner is a dynamic application security testing solution designed for modern mobile and web applications.

ENDPOINT PROTECTION*

PowerBroker Endpoint Protection combines system and application firewalls, intrusion prevention, anti-malware, anti-virus, and local vulnerability assessment.

*Starred solutions include all BeyondInsight platform capabilities, such as Clarity Advanced Threat Analytics.
