

Corporate Fast Facts

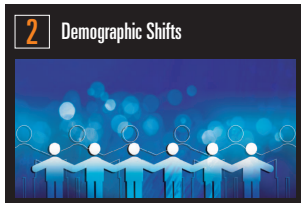

Infosys Technologies Ltd. (NASDAQ: INFY) defines, designs and delivers IT-enabled business solutions that help Global 2000 companies win in a flat world. These solutions focus on providing strategic differentiation and operational superiority to clients. Infosys creates these solutions for its clients by leveraging its domain and business expertise along with a complete range of services.

With Infosys, clients are assured of a transparent business partner, world-class processes, speed of execution and the power to stretch their IT budget by leveraging the Global Delivery Model that Infosys pioneered.

Infosys' strategic view: 4 forces are reshaping and "flattening" global businesses

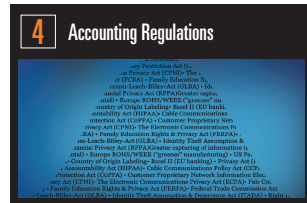

The emerging economies are going to be the drivers for growth for all industries. This will impact how companies structure and run themselves.

Developed economies have an aging population, and there is a redistribution of the global talent pool. This impacts where and how work gets done.

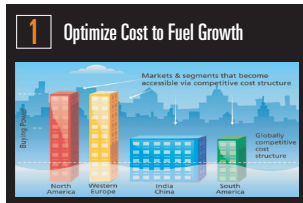

The globally distributed talent and consumer pool is enabled by technology, which redefines everything from distribution to cross-cultural communication.

There is an increase in regulations across industries and geographies, which demand accountability from corporations and also level the playing field.

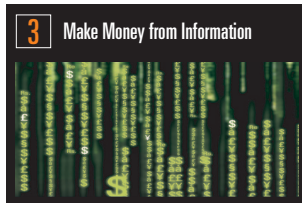

Infosys works with its clients to help them win in the Flat World

We work with our clients to restructure their cost base. This helps them enter new markets, invest in R&D and create better customer experiences.

Beyond service, customers want great experiences, which requires innovation. We work with our clients to accelerate their innovation cycles.

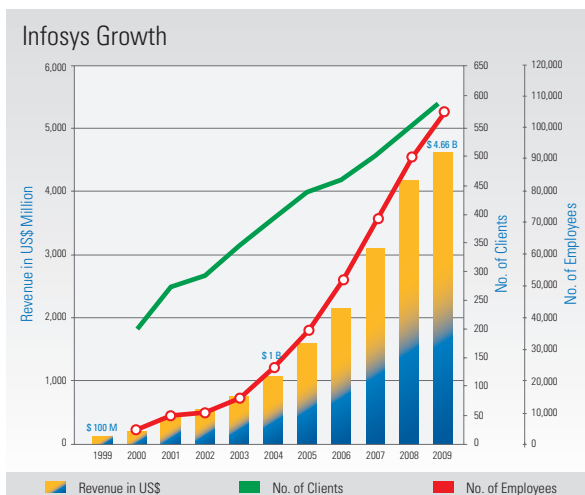

We work with our clients to create insights from structured and unstructured data. These insights help our clients make money.

We help our clients to be prepared for business cycles; to anticipate the downturns. We help them turn their fixed costs into variable costs.

Key Numbers

As on March 31, 2009
