

# BES12: The highly secure multi-OS EMM solution by BlackBerry

## ENHANCE YOUR PRODUCTIVITY AND SECURITY

BES®12 is a complete, highly secure Enterprise Mobility Management (EMM) solution designed to protect your business data and increase the productivity of your workforce by fully enabling their mobility.

Securely manage mobile devices and other endpoints across different operating systems and ownership models (personally owned or corporate liable devices). Control your mobile workers' access to apps, data and content. Do it all from a single, easy-to-use console that offers a complete set of IT policies and profiles to suit your needs and preferences.

### Make privacy a priority and secure your data, everywhere it goes

Create separate work and personal spaces on the mobile devices your employees prefer and keep work data safe in its own container. BES12 secures your business data at-rest (stored on device) and in-transit between various employee devices, your corporate network and your storage repositories. It's secure and compliant by design, providing all of the control an organization needs to satisfy the most challenging industry regulations.

### Say yes to choice and more productivity

BES12 opens up a world of choice for your mobile employees. You can say 'yes' to the kind of access and productivity that your employees are demanding by supporting all the popular mobile platforms and device types. Preserve their privacy and make it easy and intuitive to securely access the enterprise content they need without making your data and networks vulnerable to the threats making headlines every day.

### Lower, more predictable mobility costs

Consolidate everything to do with mobility in your organization. By migrating to a single solution, BES12 helps your organization standardize infrastructure while reducing complexity and risks. With BES12, your organization has the option of subscription licenses or one-time perpetual licenses (on-prem only). You can choose from cloud or on-premise—that are both cost-effective and flexible so you can scale up or down as your needs change over time.

## EASY TO TRY AND BUY

- › 60-days (on-prem) or 30-days (cloud)
- › Use of full-feature set and latest functionality in BES12
- › Device, application, and content management
- › Management of iOS, Android, Windows and BlackBerry devices (up to 100)
- › Unlimited access to award-winning Advantage Support (24x7)

## Flexible and scalable, with mobility uptime you can count on

As mobility becomes more and more embedded in your workflows and processes, service interruptions become increasingly costly. Whether your organization is large or small, run from a single office or multiple international locations, you want a mobility solution that can easily adapt as you grow. With BES12, you get mobility uptime you can count on, and it's designed to scale up cost-effectively and easily as your business grows – without adding to IT's burden.

## Award winning technical support

BlackBerry's award-winning tech support always has your back. When you need assistance, you can rely on our industry-leading Advantage Support, which comes standard with BES12. It includes 24x7 global access to experts, a 2-hour response time for high severity issues, and web-based training for IT administrators.

## Ready for today and tomorrow

BES12 is ready to meet all of your current and future EMM needs. It's not just about managing today's endpoints, apps, content, data and security; it's about preparing your organization for the new challenges and opportunities ahead. By addressing customer needs in every industry around the globe, BlackBerry is helping shape that future.
