

COMPUTACENTER

CENTERED AROUND OUR CUSTOMERS

WHO WE ARE

Computacenter is the leading independent provider of IT infrastructure services, enabling users and their business in a digital world. We advise organizations on IT strategy, implement the most appropriate technology, optimize its performance, and manage our customers' infrastructures. In doing this we help CIOs and IT departments in enterprise and corporate organizations maximize productivity and the business value of IT for internal and external users.

Computacenter provides user support, the best devices, and secure provision of applications and data to support individual working styles and improve collaboration. To achieve this, we assist with consulting as well as the implementation and operation of networks and data center infrastructures on or off customers' premises and in the cloud.

WHAT WE DO

Computacenter offers highly customized IT services and solutions, architected to meet even the most stringent corporate requirements. Rather than limiting our experience to one area of IT services, Computacenter's teams are experienced with all aspects of modern configurations, encompassing:

- Digital Workplace
- Data Protection
- Storage and Analytics
- Cloud Management and Data Center Deployment
- Enterprise Networking Infrastructure and Endpoint Security

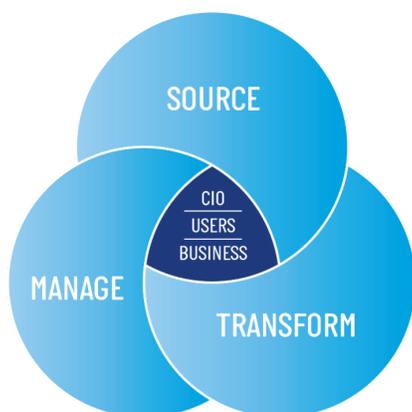

OUR MISSION

Is to maximize user productivity and the business value of IT for Enterprise and Corporate organizations. In doing so, we deliver strong returns for our shareholders and enrich our employees' careers.

MAKING DIGITAL WORK

Computacenter's Making Digital Work approach has two meanings. We leverage innovation, such as the cloud and analytics, for our customers' benefit. We also ensure new technology works with our customers' existing IT and that users adopt the change. We make digital work across our customer base and our global footprint:

CIO

We change, supply and manage our customers' IT infrastructure, to help save cost and free-up budgets for their digital transformation agenda

USER

We improve the experience of IT users and make them more productive by taking a user-centric approach.

BUSINESS

We empower and protect our customers' IT, so they can secure and accelerate their business.

Top 3 for end-user services across Europe*

Support 4m+ end-users for 300+ major European clients globally

30,000 devices shipped per day

400,000+ virtual desktops managed

30+ years' experience delivering workplace IT solutions

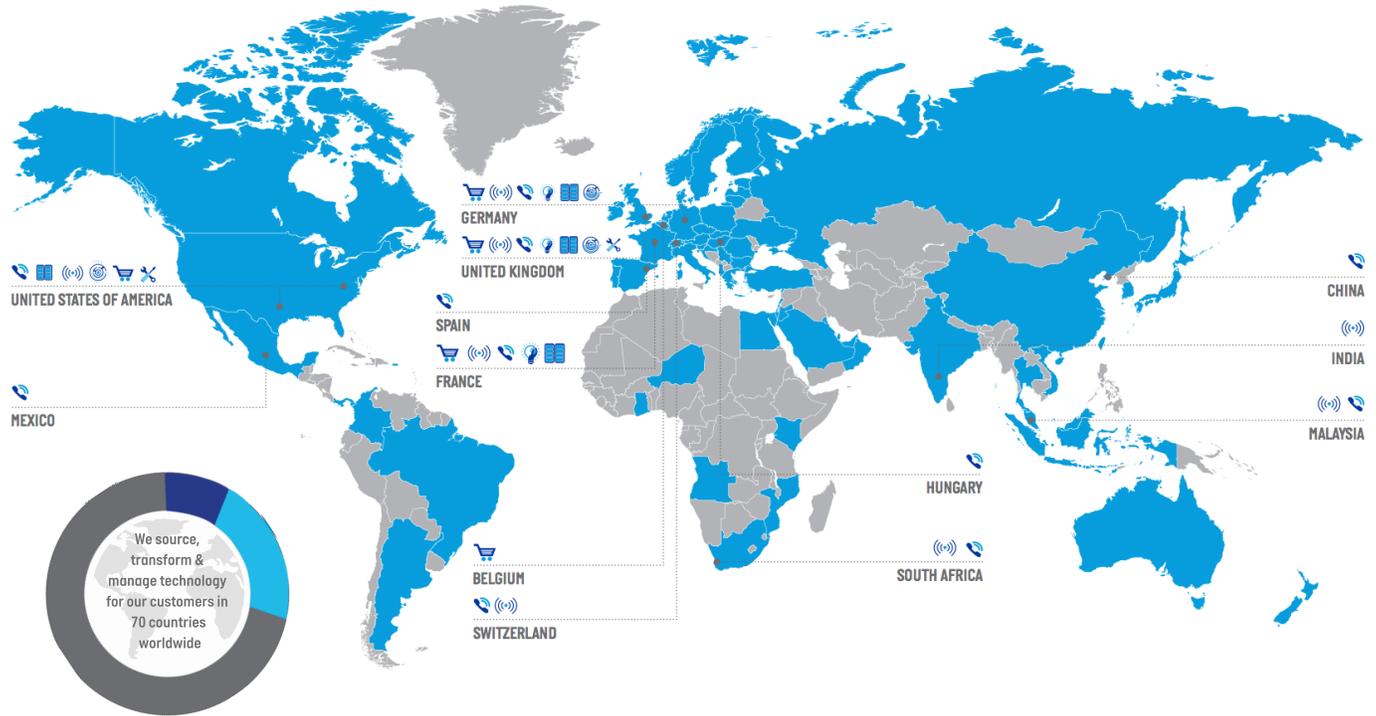

Top 3 for end-user services across Europe*

WHERE WE OPERATE

We have developed our global coverage to mirror our customers' requirements. Our standard international operation model ensures we deliver services which are consistent worldwide, but meet the individual needs of each country or region. Through our global delivery capabilities, we provide seamless, scalable and cost efficient global services.

OUR SERVICES

NETWORKING

These services begin with an assessment and are focused on optimizing resources, alongside recommending new investments for better outcomes.

USER PRODUCTIVITY

Agility-focused user productivity efforts incorporate new communication and collaboration tools, amid overall productivity and experience improvement.

SECURITY

Holistic security goes beyond standard endpoint protection, closing all gaps around data centers, networks and mobile resources.

WORKPLACE

These services enable the creation of cost-effective and change-reactive infrastructure for organizations of all types.

DATA CENTER

A data center created in collaboration with Computacenter is based on user needs and can integrate both new and existing technology into a functional, reliable and secure resource for companies.

SERVICE DESK

Offerings include 24/7 device monitoring, along with routine maintenance and the implementation of ticketing systems, a knowledge base and reporting on KPIs.

GET IN TOUCH

Bringing your company up to speed within your industry may mean a new IT deployment, standardization across many locations, improved IT oversight or all these services and more. Whatever your industry, organizational scale and current or projected needs, Computacenter may represent the answer.

If you think Computacenter is the right partner for your current project or ongoing IT needs, contact us.
