

# Powering Your Digital Transformation

Helping you innovate faster, with less risk

# We are global technology company that makes software for running and transforming your business.

At Micro Focus we help you run your business and transform it. Our software provides the critical tools you need to build, operate, secure, and analyze your enterprise in a constantly changing world. By design, these tools bridge the gap between existing and emerging technologies—which means you can innovate faster, with less risk, in the race to digital transformation.

# We help you innovate faster, with less risk, in the race to digital transformation.

Digitalization has changed everything. Organizations are unleashing the power of IT to supercharge innovation. But as you scramble to respond to the demands of digitally empowered customers, you also need to keep your business running smoothly. To that end, our solutions for digital transformation span four key areas:

1

## Enterprise DevOps—

Build and deliver better software faster

In the digital economy, winning the high-speed race to innovate requires a high-speed approach. With our solutions, you can unleash the power of DevOps across your hybrid IT landscape—quickly bringing innovative ideas to life at the pace your business demands. Now speed and quality *can* go hand in hand.

2

## Hybrid IT Management—

Operate with agility

Hybrid IT is a sprawling, volatile, siloed place that jeopardizes your ability to compete. With our solutions, you can master hybrid IT with new agility—bridging traditional and transformational IT services from mainframe to mobile, from corporate to cloud. Embracing the future does not mean replacing the past.

3

## Security, Risk, and Governance—

Secure what matters most

Cyber threats are escalating. Aging apps and processes (along with new ones) are full of unforeseen risks. Privacy and compliance requirements are mounting. And point solutions don't offer the scope, vision, or cross-silo analytics needed for these company-wide challenges. With our solutions, you can take a holistic, analytics-driven approach to securing what matters most—identities, applications, and data.

4

## Predictive Analytics—

Analyze in time to act

Lakes of data are valuable only if you can surface the insights hidden within their depths. With our solutions, you can leverage machine learning to transform unlimited volumes of data into accurate, actionable, automated insights—at the speed of your business. Now you're ready to make predictions and influence business outcomes.

# We offer a broad portfolio of solutions that covers all your digital transformation needs.

## Application Delivery Management

Project and Portfolio Management  
Application Lifecycle Management  
Functional Testing  
Performance and Load Testing  
Release Management

## IT Operations Management

Service Management Automation  
Hybrid Cloud Management  
Operations Bridge  
Data Center Automation  
Network Operations Management  
Data Protection

## Security Management

Security Operations  
Data Security  
Application Security  
Identity and Access Management  
Secure Messaging  
Unified Endpoint Management

## Advanced Analytics

Unstructured Data Analytics  
Security Analytics  
Operations Analytics  
Customer Behavior Analytics  
Fraud Detection/User Behavior Analytics

## Information Management & Governance

Information Archiving  
Secure Content Management  
eDiscovery  
File Analysis and Management  
Search and Analytics

## Application Modernization & Connectivity

COBOL  
Visual COBOL  
Mainframe  
Host Connectivity  
CORBA

**In the race to digital transformation, our solutions give you a clear advantage.**
