

About Aryaka

Company Brief

Aryaka launched in 2009 as a pioneer in delivering a managed wide area network as a consumable service. Our mission then, as it continues today, is to connect enterprises across cities, continents and clouds to deliver uncompromised application performance and operational simplicity.

As enterprises look ahead to a cloud-first future, Aryaka's Managed SD-WAN as-a-Service is an end-to-end solution built for a cloud-first world.

The Aryaka SmartServices platform removes the complexities, skillset gaps, delayed timelines and support uncertainties inherent in DIY solutions that rely on notoriously unreliable carrier-delivered services. Instead, Aryaka SmartServices offers flexibility, operational simplicity, optimized application performance and best-in-class support.

Aryaka Managed SD-WAN as-a-Service Benefits

<ul style="list-style-type: none"> Global reach with Layer 2 dedicated core Single point-of-contact for support Secure end-to-end connectivity Pre-wired multi-cloud direct links True end-to-end offer with last mile services Sophisticated multi-segment application optimization 	<ul style="list-style-type: none"> Flexibility and elasticity Day-1 SLAs via converged backbone Edge and cloud security OPEX-based cloud consumption model 99.99% uptime Centralized orchestration and advanced analytics
