

It's not just security.  
It's defence.

An aerial, high-angle photograph of a city at night. The central focus is a complex multi-level highway interchange with several overpasses and ramps. Long-exposure light trails from cars create vibrant streaks of orange, yellow, and white on the roads, and streaks of blue and purple on the overpasses. The surrounding city is densely packed with buildings, many of which have their lights on, creating a bokeh effect of small lights against the dark sky. The overall color palette is dominated by the warm tones of the traffic lights and the cool blues and purples of the city lights and overpasses.

■ The connected world.

---

As the **leading** provider of threat intelligence to the US and UK governments, we provide **business defence** no one else can match.

---

The world which we live and work in is rapidly evolving. As our dependency on technology grows, new opportunities and threats begin to emerge.

Cyber threats no longer just come from mischievous hackers playing games. They are organised, smart, stealthy criminals and nations, looking to steal intelligence and capital.

Additionally, criminals are taking advantage of modern communications and computing techniques to plan and conduct their crimes. The techniques and tools that enable business and law enforcement to detect, prevent and investigate crime – both in the physical and cyber worlds – are in the process of rapid adaptation.

And all the while, people are evolving the way they consume technology, putting more data out into the public arena than ever before.

We demand that governments, businesses, individuals and communities are all interconnected, and all with the expectation that our privacy is completely protected.

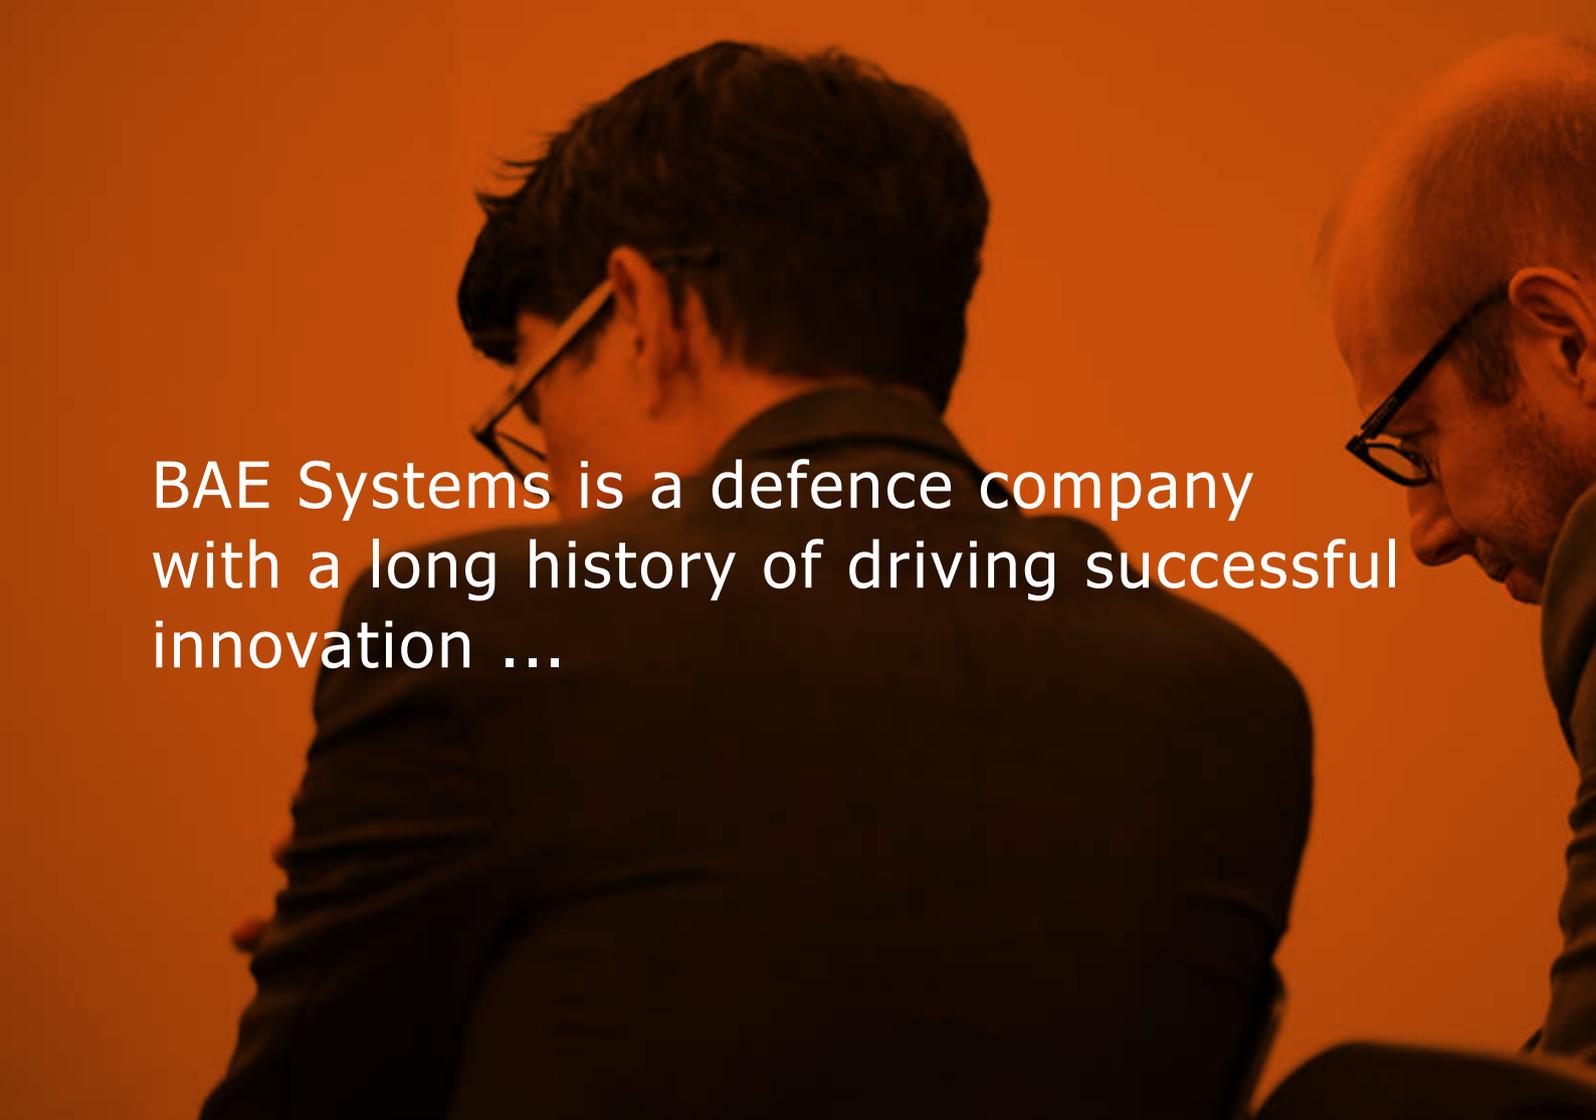

The threat is real. The lines have been redrawn. The battlefield is extending to the digital domain.

How will you keep your data, your business and your reputation safe in the new threat landscape?

 How will you keep your data **safe?**

We are  
**BAE Systems**

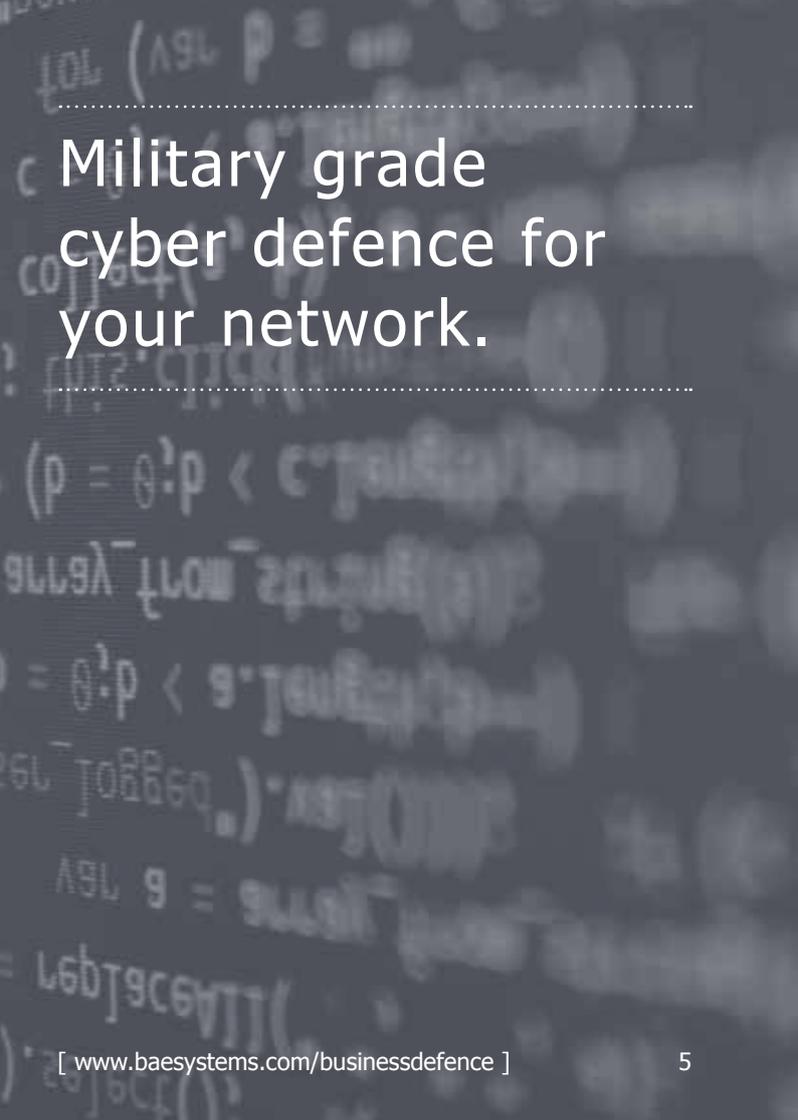

# BAE Systems is a defence company with a long history of driving successful innovation ...

We have been defending the largest, most targeted nations and businesses for over forty years against advanced threats in both the physical and digital world.

We operate in four key domains of expertise:

- **Cyber Defence:** Monitoring, analytics, email and cloud-based security, investigation and incident response solutions.
- **Financial Crime:** Identifying, combating and preventing financial threats, risk, loss or penalties.
- **Communications Intelligence:** Next generation intelligence and cyber security solutions for national security and law enforcement; compliance solutions for CSPs.
- **Digital Transformation:** Using data to pursue new business models, enhance customer engagement and improve business operations.

## Military grade cyber defence for your network.

# Cyber Defence

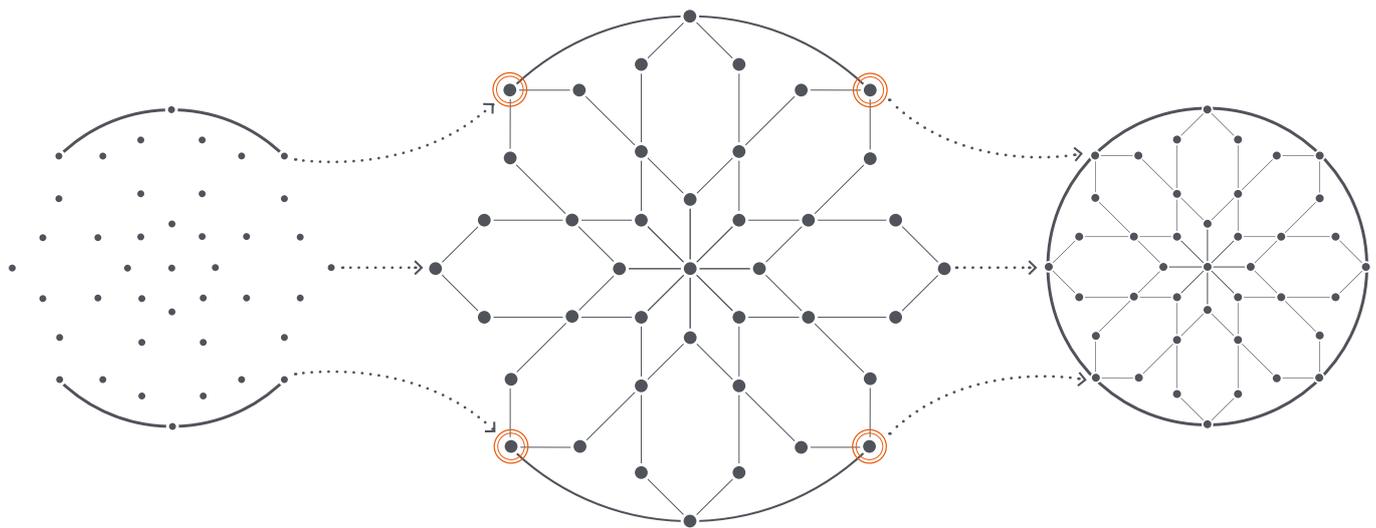

Combating evolving cyber threats isn't for start-ups or amateurs.

We take a different tack to security vendors. BAE Systems approach information security using the same techniques, analytics and intelligence we pioneered to defend nations. We bring experience at military-class levels to the protection of corporate assets. We call this business defence.

We offer a broad portfolio of on-premise, managed and cloud-based products and services that are battle proven against the world's most dangerous attackers:

- Threat Analytics
- Email Protection Services
- Insider Threat Prevention
- Zero Day Prevention
- Cyber Incident Response Services

Your business.  
Your data.  
Your defence.

Defend

## Financial Crime

The threat to financial institutions is persistent and greater than ever before.

We work with global banks, insurers and governments to provide intelligence and solutions to combat a range of criminal threats in the financial sector. We aim to protect your organisation, your customers and your reputation.

Our range of solutions can help identify, combat and prevent financial threats, as well as reducing risk, loss or penalties and ensuring your institution is fully compliant with regulatory obligations:

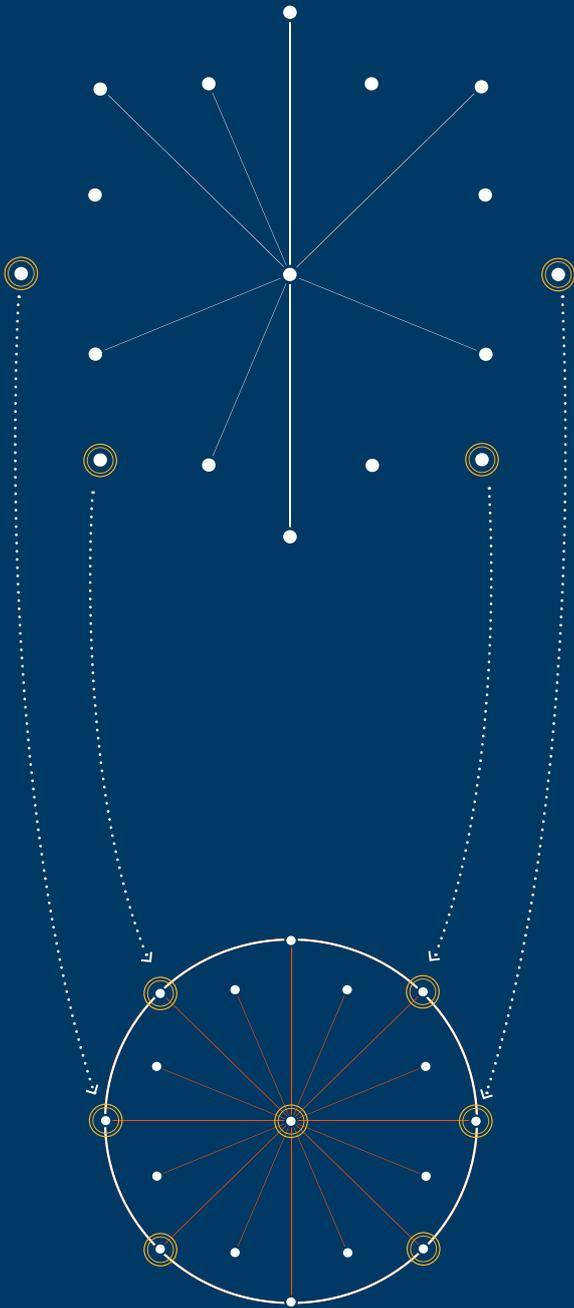

- AML Suite
- Credit Abuse and Banking Fraud
- Insurance Fraud
- Tax Fraud
- Unauthorised Trading

.....

**We defend** over  
**50%** of all financial  
transactions in  
the UK.

.....

Detect > Analyse

Monitor > React > Defend

# Communications Intelligence

Data is knowledge. Knowledge is power.

We provide sophisticated network intelligence, protection and cyber security solutions for law enforcement agencies, governments and communication service providers to ensure the criminals don't stay hidden in the digital world.

Our end-to-end solutions for national security and law enforcement agencies bring together products and service capabilities to help our clients pursue their core intelligence missions:

- Data Acquisition and Analysis
- Log Retention
- Vulnerability Management
- Mobile Defence Management
- Lawful Interception

**Intelligence** is at the core of what we do.

---

Our digital transformation solutions are inspired, people-centric, data-driven and connected.

---

## Digital Transformation

And it's not just the cyber hackers you need to stay one step ahead of.

We can create competitive advantage and enhance operating performance for your business by exploiting data and digital connectivity.

By designing and building engaging user experiences and optimised mobile channels, we can help organisations connect with their customers, employees and partners:

- Customer Engagement
- Data Insights
- Cross-channel Engagement
- Managed Insights

 We can create **competitive** advantage...

**Business defence**  
for you

BAE Systems is committed to providing intelligent solutions for a wide range of industries in the connected world.

- Commercial Sectors
- Financial Institutions
- Civil Government
- Communication Service Providers
- National Security and Law Enforcement
- Healthcare
- Transport
- Energy and Utilities

.....

We protect over  
**330 million** US  
consumer checking  
accounts every  
month.

.....

It's not just security. It's defence.

## We are BAE Systems

We help nations, governments and businesses around the world defend themselves against cyber crime, reduce their risk in the connected world, comply with regulation, and transform their operations.

We do this using our unique set of solutions, systems, experience and processes - often collecting and analysing huge volumes of data. These, combined with our cyber special forces - some of the most skilled people in the world, enable us to defend against cyber attacks, fraud and financial crime, enable intelligence-led policing and solve complex data problems.

We employ over 4,000 people across 18 countries in the Americas, APAC, UK and EMEA.
