# Top 5 reasons why you should choose

MobileIron

1

We introduced the industry's first mobile-centric, zero trust platform.

Since 2007, MobileIron has been the leader in mobile enterprise security. Our mobile-centric, zero trust approach goes beyond traditional MDM, identity, and gateway solutions by validating the user, device, applications, networks, and potential threats before granting secure access to the device. We create the intersection between high-grade security, mobile, and the way people want to work — so you can free your people to be productive without limits and passwords.

MobileIron security certifications

2

We make the mobile device your ID and secure access to the enterprise.

MobileIron makes the world's most ubiquitous product — the mobile device — your ID and secure access to the enterprise. It's how we're empowering customers to drive business innovation while ensuring devices, apps, and data are protected everywhere across the perimeter-less enterprise. Mobile users don't have time or patience to jump through security hoops that create unnecessary obstacles to business insights. With MobileIron, you can unleash mobile productivity by giving users secure, zero sign-on access to any service from any device, on any OS, from anywhere.

3

Get proven industry leadership you can trust.

MobileIron has been named a Leader in the Gartner Magic Quadrant for Enterprise Mobility Management Tools for seven years in a row. In 2018, we were recognized twice by Gartner. First, we were named a Leader in the inaugural Gartner Magic Quadrant for Unified Endpoint Management Tools. MobileIron was also named a 2018 Gartner Peer Insights Customers' Choice for Unified Endpoint Management. In addition to these honors, we also hold leadership positions in IDC MarketScape and Forrester Wave reports. Since our founding, our customer base has grown to over 17,000 companies, with many belonging to the Fortune 500. Our deep expertise has resulted in a rapidly growing list of more than 80 industry patents, including our enterprise app store. We have a large footprint in regulated and high-security industries and we're the only UEM vendor who has earned Service Capability & Performance (SCP) Standards certification two years in a row.

4

Our best-of-breed ecosystem offers outstanding choice and flexibility.

As your business grows and requirements change, you need best-in-class solutions that support your security requirements. Proprietary solutions that lock you into a solution stack may not meet your specific needs and can be expensive to maintain over time. MobileIron's vast and growing ecosystem of 370 industry-leading partners provides the exceptional flexibility you need to support your mobile security requirements today and down the road. All of our ecosystem partners are fully integrated with our UEM platform, so you can simply choose the right solutions for you with virtually no extra integration work required.

5

We drive mobile security and scalability for the world's largest enterprises.

MobileIron is one of the most security-conscious organizations in the world. Together with our mobile-centric, zero trust security platform, we hold top security certifications including Common Criteria, CSA STAR, CSIC, DISA STIG, EU-US Privacy Shield, FedRAMP Authority to Operate (ATO), FIPS 140-2 Affirmation, and SOC 2 Type II. In addition to our strong security background, our MobileIron Cloud solution offers infinite scalability to meet the changing needs of your business. Our on-premises solution is the most scalable of its kind in the industry, and supports up to 200,000 devices per server. Our ability to meet the industry's most demanding security and scalability requirements is why we are trusted by the largest enterprise customers in the world.
