

RSA FAST FACTS

RSA[®] Business-Driven Security[™] solutions uniquely link business context with security incidents to help organizations manage digital risk and protect what matters most. With award-winning cybersecurity solutions from RSA, a Dell Technologies business, organizations can detect and respond to advanced attacks; manage user identities and access; and reduce business risk, fraud and cybercrime. RSA solutions protect millions of users around the world and help more than 90 percent of Fortune 500 companies take command of their security posture and thrive in an uncertain, high-risk world.

THE PROBLEM

Managing digital risk in the age of digital transformation requires convergence among business and technical functions that have traditionally operated in silos, each with their own metrics, tools and priorities.

THE SOLUTION

To manage digital risk, organizations need unified tools that help to align all stakeholders. RSA Business-Driven Security solutions provide end-to-end visibility, insight, context and response capabilities to help organizations transform digital risk into reward.

RSA PORTFOLIO

RSA solutions and benefits include:

RSA NETWITNESS[®] PLATFORM

An evolved SIEM and threat defense solution that empowers security teams to rapidly detect threats, understand their full scope and automatically respond before damage is done.

RSA SECURID[®] SUITE

Accelerates business while mitigating identity risk by effectively delivering secure, convenient and compliant access for a dynamic, modern workforce to applications from cloud to ground.

RSA ARCHER[®] SUITE

The industry's leading integrated risk management suite, proven to help customers gain a holistic picture of risk across their business in this highly unpredictable and digital world.

RSA[®] FRAUD & RISK INTELLIGENCE SUITE

Enables organizations to manage fraud risk and digital threats across omnichannel environments without impacting customers or transactions.

RSA[®] RISK & CYBER SECURITY PRACTICE

Provides essential consulting, support and incident response expertise so that you can take command of your evolving security posture.
