WHY YOU SHOULD ATTEND

CLOUD & AI VIRTUAL SUMMIT

Develop an Innovative IT and Security Strategy to Accelerate Your Business

The IT and Security department has become a crucial element in keeping their business moving by testing and embracing new technologies that help to keep employees connected remotely. In a world that feels like it's changing by the hour, C-level and Senior IT and Security Executives are now under more pressure to keep ahead of competitors and continue to drive business growth while keeping costs down.

"We're living through a once-in-a-lifetime moment in history that brings with it both challenges but many possibilities"

Attending the Cloud & AI Summit will give you the chance to engage in peer-on-peer networking, while discussing the issues currently affecting senior executives from a variety of industries across North America.

Topics to be discussed will include:

- Building and Managing Advanced Analytics and AI Teams
- IoT and the Remote Workforce
- Pushing Cyber Resilience in 2021
- Scaling the Internal Customer Journey
- Accelerating Cloud Adoption While Minimizing Risk
- AI and Analytics

As an IT and Security leader, now is the time to produce real business value for your organization. We at CDM Media know that for you to take time out of your busy schedule, it must be time well spent. The Cloud & AI Summit agenda offers a balanced schedule of focused learning sessions, one-on-one meetings and networking opportunities that will maximize your time and efforts, providing you with ideas and strategies truly capable of changing business practices, all from the safety and comfort of your home.

Very well organized! The subject matter was timely for pretty much everyone concerned. The right people were present and in the appropriate quantity"

- CISO
