“Cloud computing and virtualization will be the top priorities for CIOs this year as businesses shift from traditional on-premise software and hardware to hosted solutions.”

-The Gartner Group, 01/19/10
The best way to harness the power of information technology efficiently and cost-effectively is with PCTs cloud-based computing services!

*Is information technology living up to your expectations?* Are you seeing the cost savings, efficiencies, reliability, and the level of computing you require?

*Before you put any more money into new equipment, software, circuits, and IT personnel, call us.* We can help. How? We put superior performance into every customer’s information technology experience. Harnessing the interoperability, flexibility, and affordability of today’s cloud computing technologies.

*Leverage the enterprise-class functionality and features* in a SAS-70 certified data center without the enterprise-class cost. Our scalable, flexible, and robust managed services model shortens deployment times, eliminates up-front license and infrastructure costs, and standardizes critical business practices. Consequently, you can focus your internal resources on successfully growing your business in an ever-changing and highly demanding environment.

*We have established a solid reputation as a top-performing customer services company* specializing in cloud computing and support services. To our customers in the private and public sectors, we have become the reliable resource to cost-effectively and reliably harness the full potential of information technology.

*If you were to ask us what it is we do,* we’d enthusiastically tell you that we are an excellent customer service organization that is in the cloud computing/Software-as-a-Service (SaaS), Infrastructure-as-a-Service (IaaS), and Platform-as-a-Service (PaaS) business. With the power of the cloud ecosystem, our customers are able to take advantage of opportunities to realize savings, improve operational efficiencies, and increase the bottom line.

*With PCT’s outstanding array of services,* your business can also have access to information technology at the highest level of performance consistently and reliably. You can identify and solve problems before they happen; develop sustainable solutions to problems as they happen; and discover and take advantage of developing opportunities now. Timely data converted to useful knowledge becomes the power to outpace the competition and win!
