CDM MEDIA ANNOUNCES CISO SUMMIT AWARD WINNERS

CHICAGO, June 12, 2013—CDM Media announced today the summit award winners from the recently concluded CISO Summit, June 4-5, 2013, at the Trump Doral Golf Resort & Spa Miami in Miami, Fla.

“The CISO Summit featured the most forerunning IT security executives from a selection of North America’s biggest brands,” said Ross Abbott, VP Sales, North America for CDM Media. “Every CDM Media event draws high-caliber participants—that’s a key aspect of our format. That said, the accomplishments of our executives both in their fields and at our exclusive summits have led them to recognize peers for truly inspiring work. We’ve developed three distinct award categories.”

ForeScout took the Game Changer Award at the CISO Summit, an award given to the organization deemed most innovative and forward-thinking by all in attendance.

Box won the CIO Choice Award, nominated by members of the delegation and selected as the leader of the most highly anticipated session at the summit.

The Peer Recognition Award is given to a single attendee voted most dynamic in his or her field. CISO Summit attendees honored John South, CSO of Heartland Payment Systems.

About the CISO Summit
The CISO Summit is a chance for CISOs and IT security executives across North America to meet with their peers from various industries. This exclusive summit features engaging Keynote Presentations, Thought Leadership sessions, CIO Think Tanks, Analyst Q&As and more on the latest information security topics and trends. Open discussions and networking time give attending CISOs and information security executives the opportunity to discuss common problems and discover new and innovative solutions.

For information on the upcoming CISO Summit, Dec. 3-4, 2013, in Scottsdale, Ariz., visit www.cisosummit.us. If you would like to attend the summit, contact Ross Abbott at ross.abbott@cdmmedia.com or +1 312.374.0840.
About ForeScout Technologies Inc.
ForeScout enables organizations to accelerate productivity and connectivity by allowing users to access corporate network resources where, how and when needed without compromising security.
