CDM Media Announces 2019 CISO Events Lineup

Expanded lineup of CISO programs launches with events in over 30 global markets

News Summary: CHICAGO, ILLINOIS (February 12, 2019) – CDM Media USA Inc. has today unveiled their lineup of C-Level executive events catering to the Chief Information Security Officer and senior IT security executive teams of large enterprise organizations. Featuring regionally-focused summits, industry-specific events, subject matter series, and exclusive executive dinners, the 2019 calendar builds upon a successful year of 2018 in more than 30 global cities.

In stark contrast to the conference and tradeshow circuit, CDM Media curates intimate, exclusive CISO events with an emphasis on peer-on-peer learning, open discussion and debate, and user-driven content that tackles the most pressing and relevant business and technology challenges alongside a selection of top solution providers. This year's slate of programs will continue that tradition as CISOs and senior IT security executives look to secure their organizations against threats both internal and external, tackle privacy and compliance issues, and drive their organizations into a secure digital future.

“There’s never been more demand for peer-on-peer education opportunities in the cyber sector for C-Level executives, and we believe this year’s portfolio of programs presents us an unprecedented opportunity to assist CISOs and senior IT security executives as they rapidly deploy cybersecurity, privacy, and other security initiatives.”

- Glenn Willis, CEO & Founder

CDM Media’s portfolio of CISO programs in 2019 will be hosted in the following cities: Amsterdam, Atlanta, Boston, Calgary, Charlotte, Chicago, Cincinnati, Cleveland, Copenhagen, Dallas, Denver, Detroit, Houston, Kansas City, London, Los Angeles, Mexico City, Miami, Minneapolis, Montreal, Munich, New York City, Orlando, Ottawa, Paris, Philadelphia, Pittsburgh, San Francisco, Seattle, St. Louis, Toronto, and Washington D.C., with more cities to be added throughout the year. The full slate of CISO programs can be found at www.cdmmedia.com/ciso.
