

ASIA-PACIFIC ELECTRONIC TRADING OVERVIEW

Rice futures are one of the world's oldest derivative instruments started in Japan. Now Asia-Pacific markets are showing they can lead once more, as equity market capitalization has surpassed that of the European time zone to challenge America.

Since the Tokyo Stock Exchange (TSE) introduced its high-speed Arrowhead platform, cutting trading costs and opening the market to algorithmic trading, market competition and innovation across Asia has intensified, causing volumes to soar. Now, SBI Japannext and Chi-X Japan are fighting it out to challenge TSE.

Japan, Australia and India have already adopted a low-latency infrastructure and have witnessed double-digit expansion in high frequency trading (HFT) participation. In addition, in 2011 the Singapore Exchange launched the world's fastest electronic trading platform and both the Hong Kong and the Korean exchanges are global leaders in securitized derivatives, while China boasts the majority of the top regional futures contracts by volume. Resource-rich Australia is also gearing up for innovation with a new regulatory structure to encourage competition and self-managed retirement plans for the active investor. Because of long distances and fragmented rule-books, colocation is king in Asia.

Interconnecting the World's Financial Markets

Equinix's global IBX data centers interconnect the capital markets in all of the world's leading financial centers. Accessing a colocation and proximity hosting platform, market participants are offered a neutral foundation from which to compete and collaborate within the world's largest multi-asset class electronic trading ecosystem.

Platform Equinix™ Features

- 16 Global Financial Centers
- 32 Markets
- 1,000+ Networks
- 175+ Execution Venues
- 99.999% Availability
- 10+ Million Square Feet of Space
- 4,500+ Potential Technology Partners and Customers
- World's Largest Multi-asset / Multi-venue Ecosystem

Data Center Solutions

- Colocation and Proximity Hosting
- Interconnection
- Low Latency Network Connectivity
- Support and Technical Monitoring
- Business Continuity Disaster Recovery Solutions

Asset Class Availability

- Commodities
- Derivatives
- Equities
- Fixed Income
- Foreign Exchange
- Futures and Options

Equinix is home to a complete ecosystem featuring the world's most important foreign exchange, equities, fixed income and derivatives execution venues, institutions, market data vendors, service providers and major networks.
