

AMERICAS ELECTRONIC TRADING OVERVIEW

The U.S. set the pace for the migration to electronic trading that has transformed the securities industry. Costs and barriers to entry have both fallen, and trading strategies have matured, broadening their scope to include more venues and asset classes.

Across the Americas, we see this trend reflected in the number of exchanges and trading platforms that move into Equinix facilities to source order volume and to service the abundant liquidity that flows through these critical hubs. We also see strong growth in the interconnection among all market participants, who enjoy the benefits of scope, scale and increased agility that come with our neutral platform.

The U.S. has the deepest, most liquid capital markets on earth. Comprising 91% of American exchange volumes, the U.S. is well supported by resource-rich Canada, the fastest growing member of the G8, and Latin America, now rightfully attracting its own expanding share of foreign investment.

Interconnecting the World's Financial Markets

Equinix's global IBX data centers interconnect the capital markets in all of the world's leading financial centers. Accessing a colocation and proximity hosting platform, market participants are offered a neutral foundation from which to compete and collaborate within the world's largest multi-asset class electronic trading ecosystem.

Equinix is home to a complete ecosystem, featuring the world's most important foreign exchange, equities, fixed income and derivatives execution venues, institutions, market data vendors, service providers and major networks.
